

# THE ULTIMATE REMOTE DESKTOP SOLUTION

Consider Thin-Client solution to your organisation. ORIGIN-LINK Remote Desktop (RDP), the new way of computing brings client-server access to virtualization, centralized management and better economic efficiency

## WHAT IS THIN-CLIENT?

### Virtualize Desktop Infrastructure

Flexible, deliver a complete PC experience for any industry-standard desktop virtualization solution

### Remote Workstation

High performance connection to workstation in Data Center/Server Room

### Server-based Computing

Low cost, self-configuring optimize task-worker deployments

### Cloud Computing

Browser-based connect easily to web application solution

## WORKING WITH ORIGIN-LINK

ORIGIN-LINK target SMB market with affordable Thin-client solution. User license start from 1, 3, 5, 10, 20, 30, 40 up to professional suite with unlimited user license

Its flexi plan without waste, upgradable to more users license by toping up minimum cost

Unlike other RDP, ORIGIN-LINK offers one time off license comes with first 1 year support warranty, next and subsequence is optional for yearly maintenance subscription.

## Should Your Organisation be Considering ORIGIN-LINK?

Thin-Client technology since 1993, mainly targeted enterprise level organisation that has minimum 80++ desktop PC for client-server based applications over LAN/WAN. SMB market hardly adopt to thin-client culture due to number of PC lesser than 80 units, will find RDP software license cost beyond the affordable level comparing to traditional way of client-server access by PCs.

ORIGIN-LINK breaks the rules and change the ideas by offering super economic, one time cost Thin-client RDP solution to SMB marketplace

### Model ORIGIN-LINK Candidates

- **Retailer** has 100++ outlets nationwide needs efficient way to maintain daily client-server access by local lay man staffs in order to ensure business continuity
- **Logistic and transportation industry** where IoT and mobility is essential for those on the move and regularly need access to database
- **Banking and finance sector** where data security and maintain staff's integrity always the highest point of expectation
- **SMB marketplace** where cost saving always be their mind of first consideration, yet efficient and reliable in order to stand ahead competition

# THE ULTIMATE REMOTE DESKTOP SOLUTION

**ORIGIN-LINK comes with mix and match solution with following components :**

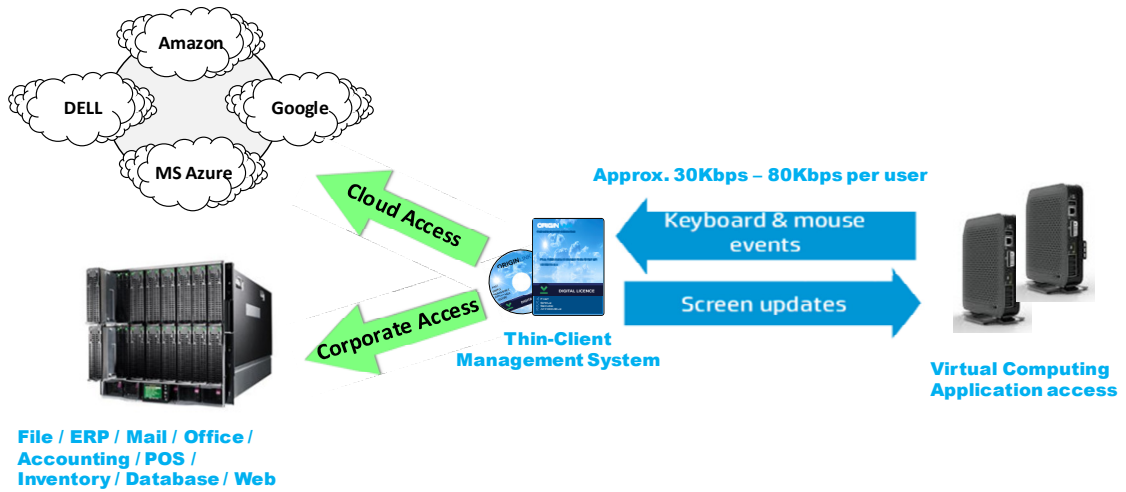

VESA Mount

Thin-Client, Keyboard, Mouse and Monitor

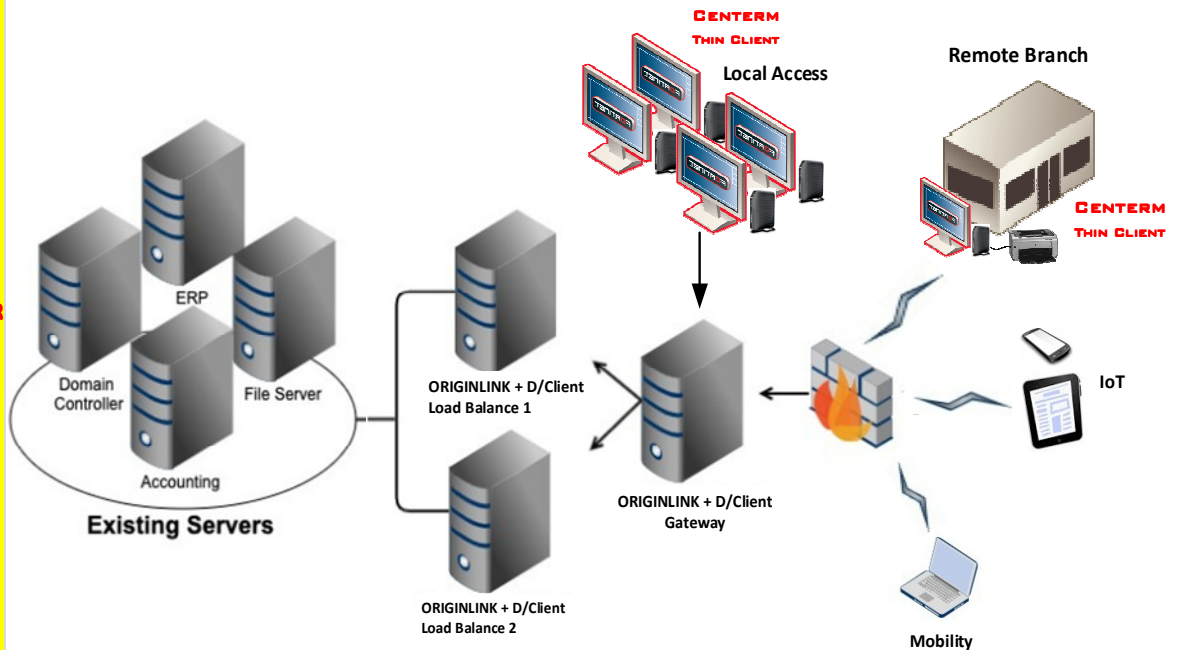

## CENTERM-THE NEW WAY OF COMPUTING

**Centerm**

## THIN-CENTER LOAD BALANCE AND AUTOFAILOVER

**THIN-CENTER**

# THE ULTIMATE REMOTE DESKTOP SOLUTION

## Centerm

**F610**

## THIN CENTER

## Centerm

**F510**

### ORIGIN-LINK KEY BENEFITS :

#### **COST SAVINGS**

- IT support costs
- Upfront purchasing costs
- Capital costs
- Licensing costs (subjective)
- Total administration and operating cost reduction up to 70%

#### **SIMPLIFY MANAGEMENT**

- All software and hardware upgrades, security policies, application changes, etc. can be made in the data center
- IT personnel are not required (as they are with PCs) to fix individual problems at the end user desktop location
- Less downtime, increasing productivity amongst End Users and IT personnel
- Centralized and simplified back up of desktops, laptops, and other client access devices

#### **REDUCED ENERGY BILL**

- Thin client consume an average of 8-20 watts compared to a 150-300 watt PC
- This reduces carbon footprint
- Cost savings from electricity can be reinvested

#### **INCREASED PRODUCTIVITY**

- Quickens setup and enables flexibility, without needing a specialist staff
- Productivity can increase, while standard PCs have long repair times that cause delays and higher costs
- Access the same apps and data from virtually anywhere

#### **ENHANCED SECURITY**

- Thin clients are protected from the use of unauthorized software or the introduction of viruses
- Data cannot be copied to a disk or saved to any other location than the server
- Centralized processing makes it easy to manage and monitor the system
- Simplify security, protect intellectual property, ensure data privacy

#### **REDUCED SPACING**

- Lightweight, 500gram
- Small in size
- Support VESA mount, space saving
- Mobility and IoT centric
